Customizable features

Your vehicle includes a variety of electronic features that can be personalized to suit your preferences. Programming these preferences requires specialized equipment and may be performed by your Lexus dealer.

It is also possible to customize certain vehicle features yourself using the "DISP" switch and the navigation screen.

For instructions on customizing vehicle features using the navigation screen, refer to the "Navigation System Owner's Manual".

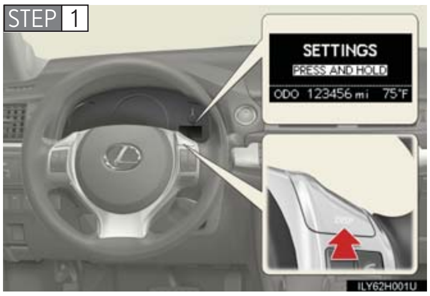

Some function settings are changed simultaneously with other functions being customized. Contact your Lexus dealer for further details.

Customizing vehicle features

It is possible to customize certain vehicle features using the "DISP" switch.

When customizing vehicle features, ensure that the vehicle is parked in a safe place with the shift position in P and the parking brake set.

STEP 1

Press the "DISP" switch to display the SETTING screen while the vehicle is stopped, and then press and hold the "DISP" switch to display the customize mode screen.

Vehicles without a navigation system:
Press the “DISP” switch and select the “METER” or “VEHICLE” and press and hold the “DISP” switch.

STEP 2

Press the “DISP” switch and select the item, and then press and hold the “DISP” switch.

STEP 3

Press the “DISP” switch and select the desired setting, and then press and hold the “DISP” switch.

To go back to the previous screen or exit the customize mode, press the “DISP” switch to select the “EXIT”, and then press and hold the “DISP” switch.

Customizable Features

1 Vehicles with a navigation system: Settings that can be changed using the screen of the navigation system

2 Vehicles with a navigation system: Settings that can be changed using the “DISP” switch

3 Vehicles without a navigation system: Settings that can be changed using the “DISP” switch

4 Settings that can be changed by your Lexus dealer

Definition of symbols: O = Available, – =Not available

Item	Function	Default setting	Customized setting	1	2	3	4
Door lock (→P. 66, 632)	Unlock on Second Key Turn (Allows all doors to be unlocked by turning the mechanical key once in the driver’s door)*1	On (Driver’s door unlocked in first step, all doors unlocked in second step)	Off (All doors unlocked in first step)	O	–	–	O

*1: Refer to the "Navigation System Owner's Manual".
*2: This function cannot be customized for vehicles sold in Canada.
*3: Interior or exterior illumination can be set separately.
*4: The default setting varies according to countries.
*5: This function cannot be customized unless power window operation using the wireless remote control is enabled.
*6: If equipped.
*7: Except when using the cruise control or dynamic radar cruise control.

■ **Vehicle customization**

- When the “SPEED SENSITIVE AUTO LOCK” and “SHIFT-LINKED AUTOMATIC LOCK” are both on, the door lock operates as follows.
  - When shifting the shift position to any position other than P, all the doors will be locked.
  - If the vehicle is started with all the doors locked, the “SPEED SENSITIVE AUTO LOCK” would not operate.
  - If the vehicle is started with any door unlocked, the “SPEED SENSITIVE AUTO LOCK” will operate.
- When the smart access system with push-button start is off, the “SELECT DOORS TO UNLOCK” cannot be customized.
- When the doors remain closed after unlocking the doors and the “AUTO. RELOCK TIME ADJUSTMENT” activates, the signals will be generated in accordance with the “LOCK/ FEEDBACK VOLUME” and the “LOCK/ UNLOCK ANSWER BACK” settings.

■ **In the following situations, customize mode in which the settings can be changed through the “DISP” switch will automatically be turned off.**

- A warning message appears after the customize mode screen is displayed.
- The “POWER” switch is turned off.
- The vehicle begins to move while the customize mode screen is displayed.

CAUTION

Cautions during customization

As the hybrid system needs to be running during customization, ensure that the vehicle is parked in a place with adequate ventilation. In a closed area such as a garage, exhaust gases including harmful carbon monoxide (CO) may collect and enter the vehicle. This may lead to death or a serious health hazard.

NOTICE

During customization

To prevent 12-volt battery discharge, ensure that the hybrid system is running while customizing features.
